9. ☐ Other _____

Reasons for Allowance

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention of training a self ordering map (Kohonen's self-organizing map – SOM) for us in a computing system wherein for a given set of training epochs, the training weights will be up dated based on a training rate that is generated according to a function that changes in a fashion that is other than monotonically decreasing with the training epochs.

The closest prior art (Mehrotra, Elements of Artificial Neural Networks) teaches the following learning rate adjustment to Kohonen's topology-preserving network (SOM):

$$0 < \eta(t) \leq \eta(t - 1) \leq 1,$$

where

$\eta(t)$ is the learning rate at time t .

Such learning rate adjustment can be classified as monotonically decreasing since the derivative of $\eta(t)$ would generally be negative (Mehrotra, Figure 5.16).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
